

# LIDIA RIBEIRO

## SOFTWARE ENGINEER

Passionate and creative full-stack software developer with a robust foundation in mathematics and a love for problem-solving.

Since transitioning to freelancing post-graduation, I have honed my skills across various technologies and industries, thriving on the challenges and opportunities each project brings.

## EDUCATION

- 2017 - 2020      **Financial & Informatics engineering Master's Degree, ESILV (Paris)**
- 2015 - 2017      **2-year intensive undergraduate program in advanced mathematics (Clermont)**

## EXPERIENCE

- April 2024 - July 2024      **Surf Camp Asutralia**  
Software engineer
- Developing a progressive web app using Node.js and React to handle upgrade bookings, process refunds, manage additional requests, and send notifications to the team.
- Feb 2023 - Feb 2024      **Airbus Defence&Space**  
Software engineer
- Identify business automation needs, create a Google-based app to meet them using Apps Script or AppSheet, and ensure successful testing, deployment, documentation, and user acceptance.
- Jan 2022 - Jan 2023      **Airbus Commercial**  
Software engineer
- Assess existing processes in the Microsoft environment for migration to Google, convert VBA-based applications to Apps Script, and document the entire transition process.
- Jan 2020 - Sept 2021      **Shaple**  
Software engineer
- Generate documentation, user guides, and articles for three Google add-ons, while also managing code updates, offering support, and aiding in maintenance tasks. Additionally, develop web applications for client projects.
